Accounting Automation Solutions

Modernize Bookkeeping, Improve Accuracy, and Scale Without More Headcount

In the world of accounting, precision and efficiency are everything but manual processes hold teams back. From invoice handling to reconciliations, reporting, and compliance, hours are lost to spreadsheets, approvals, and data entry.

With Agentic Automation from Scale Through Automation, AI agents automate core accounting tasks across accounts payable, accounts receivable, reconciliations, reporting, and compliance so your team can work smarter, not harder.

The Vision: Accounting That's Accurate, Fast & Scalable

AI agents work across systems, validating transactions, reconciling data, posting entries, and preparing reports all in real time.

What's Holding Accounting Teams Back?

- Time-consuming invoice and billing processes

- Manual reconciliations and error-prone spreadsheets

- Delayed closings and last-minute reporting

- Risk of errors, fraud, or duplicate payments

- Lack of real-time visibility across systems

Let the System Do the Work

- Extract and validate data from invoices and receipts

- Match POs and reconcile transactions automatically

- Generate journal entries and update ledgers

- Run tax calculations, compliance checks, and audit logs

- Automate reporting, cash flow summaries, and aging reports

- Sync data across finance, ERP, and document systems

Agentic Workflows in Action

Invoice & Bill Processing: Extract, validate, and post instantly.

Reconciliations: Auto-match bank, vendor, and intercompany records.

Financial Reporting: Generate reports and dashboards with no delay.

Tax & Compliance: Maintain tax accuracy and audit trails automatically.

General Ledger Automation: Journal entries posted with precision.

Key Capabilities

- AI-based invoice data capture (OCR)

- Automated 3-way matching and approvals

- Journal entry generation and posting

- Real-time reconciliations

- Tax compliance and audit trail automation

- ERP and document system integrations

Who This Is For

- Accounting firms managing high client volume

- In-house accounting teams at growing businesses

- Finance leaders who need accurate, real-time books

- Controllers looking to reduce manual tasks and errors

What You Get

Accounting Automation Solutions

- Up to 80% time savings on manual accounting tasks

- Real-time financial data accuracy across systems

- Faster month-end close and reporting cycles

- Fewer errors, duplicate payments, and compliance risks

- Fully auditable, agent-run accounting workflows

Why Scale Through Automation?

We dont just automate spreadsheets. We build intelligent accounting systems that reduce risk and unlock real efficiency.

Built for Accountants: We understand the workflows.

Powered by Agentic Automation: Our agents think and act like top staff.

Delivered for Impact: From design to deployment, we do the heavy lifting.

Get Started

Let automation take care of the numbers so your team can focus on growth, strategy, and service.
